

positivID Card Design Template

We can design your ID Card to fit your corporate image, and the look of your card is only limited by your imagination! From Font style to Holograms, were ready to help you achieve the most professional ID Card possible. Using our sample as a guide, it may help you to sketch out how you envisage your card appearing. We can then produce a graphic sample of the card prior to final production.

Example:

Features Available:

1. Staff photo, either passport sized or, larger or smaller as required. You can even have more than one photo on the card – the second one can be reduced in size and 'watermarked' similar to Drivers Licences.
2. Variable fields (i.e. ones that change from person to person) such as:
Employee Name, Job Title, Personnel Number,
Beeper No, Qualifications, etc
3. Fixed Text (i.e. text that is the same on every card) such as:
Company Name, Telephone Number, Address,
Lost Card details, Improper Use warnings, etc
4. Barcodes or Magnetic Strips – These can be encoded and linked to Variable Fields or Fixed.
5. Signature strips. These are usually on the rear of the card, and are similar to bank or credit cards. We can also provide signature strips on the front of the card – please call for details.
6. Graphics, such as Logos or Motifs. These can range in design from the simple 'Sample Care' logo shown here, to photos or watermarks.
